Company Overview

The ***Brevini Group*** is one of the top gear box design, manufacturing and service operations in the world with over 1,700 employees and total Global sales in 2008 expected to reach almost 500 Million Euros. Since it's founding in 1960, the company has designed, manufactured and serviced one of the most dependable line of gear drive applications for a variety of heavy equipment, utility, mining and marine uses world wide.

Headquartered in Italy, the Brevini Company specializes in the design, manufacturing and servicing of very sophisticated applications of planetary gearboxes with hydraulic and electric motors for low speed, high torque equipment.

Over the past 15 years Brevini has developed a wealth of experience in the Wind Energy Business, becoming one of the largest suppliers of Pitch and Yaw applications for the Global Wind Energy Industry. *During this same period Brevini has develop a series of main drive applications for German & American wind turbine manufacturers. Now, under the latest Brevini Company, Brevini Wind, we offer several technologies with prototypes ranging in power from 1.5 and 3 MW.*

Main production locations in Italy, Germany and China will now be joined by *the latest manufacturing facility being constructed in Muncie Indiana, USA. With a Start of Production (SOP) target set for the 1st Quarter 2011, this latest facility will focus on the continued design, manufacturing and servicing of main drive applications for the Wind Energy Business.*
